

Stainless steel faucet

No need to drill an extra hole in the counter top

Separate tubes for purified and untreated water

Bluewater 3-way kitchen faucet

A premium stainless-steel kitchen faucet for both reverse osmosis water as well as hot and cold untreated water. No need to drill an extra hole in your kitchen counter top.

Made of stainless steel to avoid metal leaching into the water, which can happen with other materials such as brass.

Tested and especially approved for reverse osmosis (RO) water. Delivers purified water and hot and cold untreated water from the same faucet, but from different tubes with no risk of cross-contamination.

Features

- High quality stainless steel faucet
- Ceramic valves
- Separate tubes for purified water and hot and cold untreated water
- Best in class water flow
- User friendly with 360 degrees swivel
